

Labmatrix[®] Instant Insights powered by AI

Prepare for the next breakthrough in real-time data exploration as Labmatrix integrates AI to deliver instant, actionable insights.

Labmatrix is our comprehensive, cloud-based sample management system designed to streamline clinical trial operations and maximize the value of biospecimens. Our innovative AI platform empowers you to unlock critical insights.

INSTANT NATURAL LANGUAGE QUERIES:

Ask questions and get answers without the need for building queries.

DIRECT ACCESS TO VITAL METRICS:

Quickly zoom in on the datasets and metrics that truly matter, bypassing the need for manual navigation through predefined dashboards.

INSTANT MINI DASHBOARDS:

Labmatrix instantly generates integrated mini dashboards to visualize related data.

Intelligent, context-driven features

- **Natural language interaction:** Enjoy the simplicity of natural language queries, making complex insights accessible without specialized training.
- **Contextual prompts and common questions:** Labmatrix anticipates your needs by suggesting common queries and context-based prompts to guide your search.
- **Continuous exploration:** Engage ongoing data exploration by easily asking follow-up questions to drill further into the details that drive your research.

- **Query resolution time:** Get answers to complex data questions in seconds.
- **Audit-ready data:** Reduce audit preparation time with easily retrievable and AI-organized data.
- **Reduction in manual effort:** Decrease hours spent manually searching, filtering, and organizing sample and consent data.
- **Improved site operations:** Natural language exploration enables quick viewing of sample and data query statuses, helping reduce delays at the site level.
